

SSOS April Bulletin

SSOS ANNUAL GENERAL MEETING - 9 MARCH 2015

The Annual General meeting was called to order at 8:07pm by President Frank Daniel.

A motion was made by Sandra Crosby that the Minutes of the 2014 Annual General Meeting as presented in the April 2014 Bulletin and emailed and posted to members be accepted as accurate. Motion carried.

PRESIDENT'S REPORT:

I would like to congratulate you all on another very successful year in all aspects at our monthly meeting, Swanes Nursery Winter and Spring shows, as well as the Southern Orchid Spectacular. The quality of the plants have been extraordinary.

I would also like to welcome the 9 new members who joined the Society this year. Throughout the year we had 3 auctions. Firstly for the estate of the late Alan Holsted, then our own members' auction, followed by one of our long term members, Kevin Wilson. I would like to thank all those who put in a lot of time and effort to make these a success.

I would also like to thank the following for their commitment to make the Society very successful. To our Bulletin Editor, Daniel Coulton; to our photographer Pam Davies, to Marge & Karen Errington for the job they do in looking after us at our break. To our raffle sellers John Costa and Robert Nicol, and also to John Costa for his tireless work on the Sales Bench at Swanes and the Spectacular, and to those others who helped out on the Sales bench. To the committee, firstly George Birss for his articles in the Bulletin and also holding the new member/novice group sessions

at his house. To Louise Gannon for her role as Show Secretary at Swanes Winter and Spring shows especially this year as she did not have the help of Bob Moar as Show Marshall, who was unable to spend time this year owing to personal issues. Louise did the lot, well done Louise.

Upcoming Events

April Meeting 8pm at the Uniting Church Hall in Sutherland 13 April 2015.

We will be having a special guest speaker from the UK speaking on carnivorous plants.

- SSOS Winter Show 2015
- Castle Hill Orchid Show
- Orchids Out West
- Mingara Orchid Show
- St Ives Orchid Show

Also, Louise is retiring from this position at the end of this year so we are asking for someone to come forward to take over this important role. Rhonda Jackson, our Secretary who does such a great job making my job as President so much easier. The Committee, Cheryl Matheson must take all the credit for her work putting the display together at the Orchid Spectacular in which we finished 2nd, and I am sure if more of our senior growers were to put plants into our display we would have a great chance of winning. Richard Dimon, the new boy on the block has added a lot to the committee and is very keen to put his hand up to do whatever he can. Our past president, Murray Aldridge for his guidance and knowledge to me and the committee. Last but not least, Jan Robinson our retiring Treasurer after 6 years. The time is up for Jan and I must congratulate her on a great job of looking after our financial interests and stopping the committee spending too much, and as you can see by her report we are in good shape.

We look forward to this year with bigger and better shows but we still want people to join the committee or be part of the team at Swanee or the Spectacular or both.

Gary Hodder motioned that the President's Report be accepted. Carried.

TREASURER'S

REPORT

The Annual Statement for the Financial Year 2014 as presented, is hereby accepted for submission to the Department of Fair Trading, and that the

Treasurer, Jan Robinson be allowed to sign the Statement. Motion by Daniel Coulton, Seconded by Richard Dimon.

ELECTIONS

Frank invited Wal Chapman, as Returning Officer, to conduct the election of the positions on the committee. In accordance with the Society's rules, all positions were declared vacant.

Nominations for positions on the committee have been received from the following members:

PRESIDENT: Frank Daniel

VICE PRESIDENT: George Birss

TREASURER: No nominations were received

SECRETARY: Rhonda Jackson

COMMITTEE: Murray Aldridge, Richard Dimon, Cheryl Matheson, Jan Robinson, Louise Gannon

As there were no other nominations from the floor, the people listed above were unanimously accepted into the positions.

The committee will consider how to manage the lack of nomination for the role of Treasurer.

Frank sincerely thanked to Jan Robinson and presented her with flowers and a bottle of wine in appreciation for her conscientious dedication to the position of Treasurer for the last 6 years and her enthusiastic commitment to the benefit of the Society.

The meeting was adjourned at 8:15pm.

SSOS GENERAL MEETING MINUTES - 9 March 2015

Frank Daniels extended a welcome to our members, and guest Cecily Rogers, Councilor of the Horticultural Committee, Royal Agricultural Society of NSW. Daniel Coulton motioned for our February meeting minutes which were distributed to members through the Bulletin, either by mail or email, be accepted as accurate. Carried.

There are no new members to welcome this month into the Society.

Correspondence received:

- Email from Eurobodalla Orchid Club advising their orchid workshop in March is full.
- Email from Rod Shoosmith, advising early bird bookings for the AOC Orchid Conference has been extended to 21/03/2015. The conference dates are 18th - 23rd September 2015 and is being held at the Mackay Entertainment & Convention Centre.
- OSNSW 2015 February *Orchid News*
- Newsletters from North Shore Orchid Society, Eurobodalla and Bankstown Orchid Societies

TONIGHT:

Bob Bishop from Kiwi Bark presented to members on the uses of the range of sizes of his raw bark product and the success growers were having with using it. He was keen to remove his plants from their pots to show members the healthy root growth from using a combination of his bark, charcoal and perlite mix. The members who purchased his product will have the opportunity to do the same in a few months' time.

APRIL meeting: Mike Hitchcock with talk about his trip to South Africa

MAY meeting: Annual plant auction - no sales table

JUNE meeting: To be advised

JULY meeting: Orchid Tray Company to talk on their products

contribute an article to the Bulletin in 2015. So start writing those articles. They can be on any orchid related topic.

- George Birss is holding a Novice Group meeting at his house on Saturday 14 March, from 1:00pm - 4:00pm. Jan Robinson will talk about staking plants; George will talk about what to do with overgrown plants in pots and how to trim and hack off unnecessary growth; and Mike Hitchcock will talk about using additives. Members are able to bring their troublesome and unwell plants and those they're not sure what to do with.
- For those members who knew Brian Gerhard, the owner of Down Under Native Orchids, he passed away in February after an illness. His funeral was on Wednesday 26 February 2015.
- At the last meeting one member was left to put the tables away on his own after the meeting. All members are asked to stay and help put the tables and chairs away at the conclusion of the meeting. We all want to get home early so if everyone helps, we can close the hall quickly. Please consider assisting where possible.
- It has been noticed that members are audibly talking during the presenters' talks at our meetings, which is very distracting for all. Members are asked to be considerate of the presenters and not talk during their presentations. If members wish to talk, would they please go outside?
- Members please note that at the Auction night at the May meeting, there will be no sales table.
- In the March Bulletin, there was information on exhibiting plants in the Royal Easter Show. If members want more information, please contact Jan Robinson who has the brochure.
- Richard Dimon is developing a Facebook site for the Society for members' discussions, photos and interactions regarding orchids. The committee is happy for the site to operate provided comments are appropriate and do not cause offence.
- Just a reminder to members that the Society has badges that members are welcome to purchase and wear at meetings and other activities. They cost \$5 and are available from the sales table.
- Tonight seedlings were issued for the seedling competition where plants will be judged progressively at the general meetings over the next two years based on how well they are grown. The seedlings are *Zygopetlum* plants. There are two classes in the competition, a Novice/Intermediate class and an Open class and it costs \$5 to enter. Judging of the plants

ITEMS OF INTEREST

- With a view to encouraging articles for the Bulletin, the Society is offering members the chance to win a Bunnings voucher if they

will occur every 3 months and participants need to have their plants judged at least 5 times during the competition to qualify for winning. The first judging will occur at the June meeting.

2014 BULLETIN ARTICLE DRAW - Gary Hodder

NAME BADGE DRAW – Doris Katergarakis

PRESIDENT'S AWARD – Richard Dimon for Dendrobium Moropphyllum

LUCKY PLANTS – Louise Gannon, Sandra Crosby & Tony Costa and Lee Buivids

RAFFLE - Gary Finn (2), Frank Daniel, Pam Davies, Sandra Crosby and Judith Leong.

Next meeting: 13 April 2015

WANT TO WIN A BUNNINGS VOUCHER?

Do you have something interesting happening in your greenhouse? Is one of your orchids so wonderful you would love to tell everyone about it? Why not write an article for our Bulletin? It doesn't have to be long and you could include a photo or two so we can appreciate what your beautiful plant looks like. It could be a story about an orchid show or event, or some other interesting topic.

If your article is published in the bulletin, you will be in the running to win a Bunnings voucher at the end of the year.

So get your pens out or turn your computer on and get cracking. Articles should be sent to our editor, Dan Coulton at dan_the_man351@hotmail.com.au, Ph 0419466986.

Novice Group Meeting at George's place Saturday 14 March, 2015

What an enjoyable afternoon we all had, not only did we have a few good laughs but we all actually learnt something as well!

After George showed the members how to repot a few different genera of orchids, Mike took the floor and explained some of his thoughts on the virtues of iron chelates and Epsom salts on orchids.

Jan showed us how to stake a flower spike and also how to repot a stanhopea.

After a short break for afternoon tea, thoughtfully prepared by George's wife Marge, we had an interesting look around George's growing areas and then we were straight back into it again.

A number of novice members had brought along some plants that they needed some advice on, and a few of the plants were repotted.

The 4pm finish time went by with all of us wanting more. Even when one of George's neighbours called him for a 'beer break' it could not sway our interest or fortunately, George's.

We all left around 5pm with a little more confidence in working on our orchids.

The novices and committee members present thanked George for organising the afternoon. We will all be eagerly looking forward to the next one in two months' time.

Louise Gannon
Committee Member

In My Green House

Isn't this weather great, plenty of rain about, enough to make ever thing in the garden look green and new but not enough to stop you getting out and looking after you orchids. Warm days and nights it is just great for growing and when things grow and are moist and warm that's when you have to take extra care. Fungus and creepy crawlies are about. To keep fungal problems at bay give your plants a good spray with MANCOZEB, 2 sprays 10 – 14 days apart. If your plants are growing well so will the weeds, keep an eye on them in pots and under your benches.

I am still having trouble with Mealy Bug and scale, I think I've got it all and then pick up a plant in another area and find more. Just goes to show that you have to keep checking all the time and keep up the spraying.

Also I have noticed an increase in Dendrobium Beetles around particularly on the Speciosums in the garden.

I have just worked my little butt off. Took ever thing out of my glass house, replaced an inner lining of plastic, tidied up under all the benches and levelled the benches, big job in a confined area. Then came the good bit putting all the plants back, this time in some sort of order, re potting a few, re staking and tidying up the plants. Wether through good luck or I would like to think good management there were no serious problems.

I have stood a lot of my plants in trays or dishes of water and after Bob Bishop's talk at our last meeting night it was pleasing to here others share the same methods. Not all plants like this method but some certainly do. Water well pots are also an alternative.

Walking around my greenhouse I find surprises in every corner.

I have a number of Dendrochilum in flower with their cascading flower spikes and a number in spike, hopefully in flower for our winter show. I have Oncidiums with wonderful new bushy growth and plenty of flower spikes. Cattleyas, either in bud or with flower sheaths. Made a big, big mistake the other day when moving a specimen plant, moved it in the morning, and didn't take enough care, bumped the new growth and snapped it off. One whole year down the drain, bugger. Lesson, be careful of soft new growths. If you have any Laelia anceps, and ever body should have at least one of these beautiful orchids in their collection, even if tied on a tree in the back yard. Have a look for flower spikes, mine are all in spike. General rule don't stake (unless transporting to a show) let the inflorescence sway in the breeze. Terrific colour and different colour varieties.

One thing that came out of the recent "novices day" was POT SIZE. It is always great to try different things and experiment but don't think that it is easy to put a small orchid into a large pot that way you won't have to re pot for a long time. Also look at the roots, fine, short roots on your orchid don't need a deep pot. For a small plant with fine roots a squat pot just bigger that the root ball is sufficient. For an orchid with short roots a shallow pot or tray is preferable. If you have a plant with big, long, fat roots like a cymbidium your plant needs a deep pot, not too big in diameter but so the root system has room to spread.

On Cybmidiums now is the time you should be cleaning up your plants, removing old husks and unsightly leaves. Watch for flower spikes. Spray with NEEM OIL and spray leaves with MANCOZEB. If your plants area open to all this rain drench with Anti rot or fongarid. Watch out for grubs, grasshoppers and Dendrobium Beetles that all just love munching on new flower spikes.

With all this rain about you may still need to water if no rain for a couple of days or if your plants are under cover and keep up the fertilizer.

Don't forget Castle Hill Show in April and as a tip to new growers, try to stay away from 50mm tubes, spend a little more and buy an established plant in an 80mm pot and re pot in YOUR mix when you get home.

Sutherland Orchid Society Growing Competition

The SSOS growing competition for financial members will be run as follows:

- The purpose of the competition is to encourage members in growing and caring for seedlings through to the flowering stage.
- There will be two classes - Novice\Intermediate and Open
- Plants will be purchased by the Society. Cost to enter is \$5 for members, SSOS will fund the balance.
- The competition will run over 2 years.
- Plants will be numbered and will be issued to names drawn by ballot from competition entries. The first plant will go to the first name drawn and so on. The member's name will be recorded against the plant number. When benched, the member will put their number on a tag to place in the pot.
- Plants may be benched every 3 months. Plants must be benched at least 5 times during the competition to qualify for winning.
- Judging will be performed by two experienced growers (not necessarily "accredited" judges).
- When plants are benched, points are awarded: 5 for 1st, 3 for 2nd and 2 for 3rd place, based on the best cared for plants. 1 point is awarded to everyone else who benches their plant.
- At the meeting benchings, 1st place from each class will be awarded a SSOS \$5 voucher
- Members from the 2 classes with the most points at the end, wins the competition. The winners will receive a Bunnings or Orchid Trade Company voucher.
- If novice and intermediate growers are promoted by the Society to the next class they will remain the Novice/Intermediate class for the duration of the growing competition.

You Grew It

***Trichoglottis brachiata* grown by W. & J. Chapman**

This very stunning species orchid is from the Philippines and is found at elevations from sea level to 300 metres which makes it a hot growing orchid. It is generally grown in a basket with a well drained mix or on a tree fern mount. The usual growing pattern is an erect stem that can be trained to climb, where numerous white roots along the stem give the plant a branching affect. The flowers appear along the stem in a zig zag pattern. They have a very waxy appearance, fragrant and richly coloured, with dark purple almost

chocolate brown flowers with a bright fuchsia lip.

This orchid likes lots of water and fertilizer when in active growth, very bright light and frequent misting of its roots especially if hot and dry. As it comes from the Philippines and grows below 300m it would require a heated glass house that does not get below 15 degrees Celsius.

This flower of this orchid is stunning and if you are fortunate enough to have a heated glass house it is worth having a *Trichoglottis* in your collection. A few years ago I attended a Society meeting of the Coffs Harbour O.S. and a member exhibited an orchid of this species. Their climatic conditions are a lot more tropical than Sydney and I am not sure of their growing conditions but their plant was about 40 - 50 cm in height and carried about 50 flowers, the only word for it was spectacular and I was very envious.

***Dendrobium monophyllum* grown by Richard Dimon**

This wonderful mini to small creeping *Dendrobium* is found from Cape York Peninsular in Northern Queensland to the northern parts on New South Wales. It can be found in varying conditions from exposed sandstone rock faces to outer branches of rainforest trees growing at sea level to 1000 metres as an epiphyte or lithophytes requiring bright light and constant air movement.

Monophyllum has shallow roots and therefore does not require a deep pot. It grows well mounted on an old piece of fence palling, a slab of tree fern or in a shallow "dish" pot. The creeping habit of this orchid that grows into large clumps that has 10 - 20 cm pseudobulbs with a 10 cm inflorescence that can carry up to 20 golden yellow bell shaped, long

lasting, sweet smelling, waxy flowers.

Keep moist and fertilize all year round in a well drained mix.

Richie nurtured this orchid in his green house and although it grew never took off, so needing space for other orchids moved it outside under a shrub and using the old adage "neglect is the best way to grow orchids" found that it thrived, grew in size and flowered. Sorry to give away your secrets Richie.

***Dendrobium Victoria Reginae* grown by Lee Buivids**

Commonly called "Queen Victoria's *Dendrobium*". Named by Augustus Loher in 1897 in honour of Queen Victoria who was about to celebrate her sixteenth anniversary on the British throne.

This species comes from the Philippines and is found at elevations of 1300m to 2700m making it a cool growing epiphyte (growable in a shade house in Sydney). This orchid is found growing in deep shade, with good air movement with the roots always growing in damp moss,

thus requires even humidity and moisture throughout the year and can bloom at anytime, sometimes more than once but usually around the end of Summer and into Autumn.

The pendulous nature of this orchid suggests a hanging basket using medium bark or sphagnum moss or mounting is best, if mounting use bush moss around the roots NOT spag. moss. The pendulous pseudobulbs that reach 60cm branching as new growth bears its flowers in small clumps of 3 – 4 flowers from the leafless canes that narrow at the base. The superb blue – lavender flowers that can range through to white can also have a great variation of stripping on the segments of different clones.

I have a couple of small *Victoria reginae* and a couple of Hybrids that all grow well in my Shade house in hanging wood baskets in Co Co and or bark mix with good air movement. The pendulous pseudobulbs hanging among other orchids give a bright display even though the flower count is not spectacular. Easy to grow with little attention needed and few pest worries. Water and fertilise regularly.

***Paphiopedilum Sukhakullii* grown by S.T.Ho**

Named after Prasong Sukhakul a Thai orchid grower

A Species from Northern Thailand, growing at elevations of 240m – 1000m making it a hot to warm grower. The areas where it grows in the wild has heavy rain from summer to winter and a cool dry spring. It is found in sandy loam soil and leaf litter along streams with dappled to moderate shade.

The plant has pale to dark green mottled leaves that are up to 13cm long and 5cm wide. There is a single flower. It prefers a temperature range of 17 – 25 deg. C and a hint maybe to induce flowering reduce water in winter. Pot in a well drained mix.

The flower has wide flat petals, showered with hundreds of spots and a nice reddish shaded lip. The petals have fine hairs or "eye lashes" along the upper and lower edges.

Because of the flowers structure this Paph. Is great for Hybridising and there are over 800 hybrids using Paph. Sukhakullii as a parent, grand parent or great grandparent, etc.
